

Letter to my Tutor
By Etta

This past year was fun when we was going on trips and doing some art work; when you come to my house and I take pictures with you. When we was going on some trips it was fun because I got to bring my cousin and you packed us some food.

The thing that I want to do now is some more work and to go on more trips with you, and I want to call you sometimes when you are not doing anything. The other thing that I want us to start doing is reading more and writing more and having more time together.

This past year was great with you because when I'm with you I can be free and when I'm with you I can do all kinds of stuff and I can read with you.
